Quiz 4

1 **MULTIPLE CHOICE** 0 / 0.5

Which of the following levels of autonomy is primarily associated with teleoperated robots and industrial manipulators?

A. Level 3

B. Level 2

C. Level 0

D. Level 5

2 **TRUE/FALSE** 0.5 / 0.5

Robots with Level 5 autonomy can handle all tasks and decision-making processes without any human intervention.

True

False

3 **FILL IN THE BLANK** 0 / 0.5

In robotics, understanding the levels of autonomy helps in designing and implementing **integration** systems suitable for different applications.

4 **FILL IN THE BLANK** 0.5 / 0.5

The Society of Automotive Engineers (SAE) and the U.S. Department of Defense have defined **level** of autonomy.

5 **FILL IN THE BLANK** 0 / 0.5

In Level 1 autonomy, robots require **commands** for complex tasks.

6 **MULTIPLE CHOICE** 0 / 0.5

Which of the following is an example of Level 2 autonomy?

A. Teleoperated drones

B. Robotic vacuum cleaners

C. Fully autonomous vehicles

D. Advanced driver assistance systems (ADAS)

7 **MULTIPLE CHOICE** 0.5 / 0.5

Which application is most likely to benefit from Level 4 autonomy in robotics?

A. Basic household chores

B. Manual control in hazardous environments

C. Advanced industrial automation

D. Simple navigation tasks

8 **FILL IN THE BLANK** 0.5 / 0.5

level 3 robots can perform tasks autonomously under specific conditions but require human intervention in complex or unpredictable scenarios.

9 **MULTIPLE CHOICE** 0.5 / 0.5

Which level of autonomy describes robots that can navigate and drive in most environments without human intervention?

A. Level 3

B. Level 2

C. Level 4

D. Level 0

10 **TRUE/FALSE** 0.5 / 0.5

Level 0 autonomy in robotics means the robot has no autonomous capabilities.

True

False
