

## Quiz 1

1

### MULTIPLE CHOICE

0.5 / 0.5

Robotics is an interdisciplinary branch of engineering and science that combines:

- ☐ A. Economics and Psychology
- ☐ B. Biology and Chemistry
- ☒ C. Computer Science, Mechanical Engineering, and Electrical Engineering
- ☐ D. Physics and Mathematics

2

### TRUE/FALSE

0.5 / 0.5

Control systems in robotics are algorithms that determine how a robot reacts to sensor inputs and achieves desired goals.

- ☒ True
- ☐ False

3

### TRUE/FALSE

0.5 / 0.5

Robots are typically designed to perform tasks that are traditionally done by humans.

- ☒ True
- ☐ False

4

## MULTIPLE CHOICE

0.5 / 0.5

Which of the following fields does NOT directly contribute to the development of robotics?

- ☐ A. Electrical Engineering
- ☐ B. Computer Science
- ☒ C. Sociology
- ☐ D. Mechanical Engineering

5

## FILL IN THE BLANK

0.5 / 0.5

The ethical use of autonomous robots in sensitive areas like warfare raises ethical concerns.

6

## FILL IN THE BLANK

0 / 0.5

Robots designed for hazardous environments like deep-sea exploration or space missions are called explore robots.

7

## TRUE/FALSE

0.5 / 0.5

Artificial Intelligence in robotics helps robots make decisions, recognize objects, and interact intelligently with their environment.

☒ True☐ False

8

## MULTIPLE CHOICE

0.5 / 0.5

What is a major socioeconomic impact of robotics mentioned in the presentation?

- ☐ A. Decreased efficiency in manufacturing
- ☐ B. Increased leisure time for humans
- ☒ C. Job displacement due to automation
- ☐ D. Increased manual labor jobs

9

## TRUE/FALSE

0.5 / 0.5

Sensors provide environmental data while actuators perform physical actions in robots.

- ☒ True
- ☐ False

10

## FILL IN THE BLANK

0 / 0.5

The study of motion in robotics is called autocontroller.
